RESEARCH INTERESTS

My research focuses on the control of renewable energy systems and smart grids. I aim to develop theoretical methods that ensure stability, dynamic performance, and optimal operation of future large-scale energy systems by integrating control, optimization, and machine learning.

- **Stability and Dynamics:** Modeling, small-/large-signal stability analysis, and control of inverter-dominated energy systems, with emphasis on interactions and scalability
- **Coordination and Performance:** Coordinated and distributed control of large-scale inverter-based resources for optimized dynamic performance and ancillary services
- **Standardization:** Development of IEC-standardized models of inverter-based resources and next-generation grid-integration specifications (under IEC SC 8A)

APPOINTMENTS

- **Tenure-Track Assistant Professor** Aug. 2026 – Present
Department of Automation, Tsinghua University, China
- **Research-Track Assistant Professor** Jul. 2025 – Jul. 2026
Department of Automation, Tsinghua University, China
- **Senior Researcher** Nov. 2024 – Jan. 2025
Automatic Control Laboratory (IfA), ETH Zürich, Switzerland
- **Postdoctoral Researcher** Nov. 2021 – Oct. 2024
Automatic Control Laboratory (IfA), ETH Zürich, Switzerland
Advisor: Prof. Florian Dörfler

EDUCATION

- **Ph.D. in Control Science and Engineering** Aug. 2016 – Jun. 2021
Department of Automation, Tsinghua University, China
Dissertation: Research on Synchronization Issues in Power Systems with High Penetration of Power Electronics [\[link\]](#)
Advisor: Prof. Hua Geng
- **B.S. in Automation** Aug. 2012 – Jun. 2016
Department of Automation, Tsinghua University, China

AWARDS AND RECOGNITIONS

- **The 2024 ISGAN Award of Excellence RUNNER-UP** Mar. 2025
- **First Prize of Science and Technology Progress Award of China Electrotechnical Society (CES)** Dec. 2024
- **First Prize of Science and Technology Progress Award of China Power Supply Society (CPSS)** Nov. 2023

• Stanford/Elsevier Top 2% Scientists	2023, 2024, 2025
• Outstanding Doctoral Dissertation Nomination of CPSS	Apr. 2023
• Outstanding Doctoral Dissertation of Tsinghua University	Jun. 2021
• Beijing Outstanding Graduates	Jun. 2021
• Best Paper of IEEE Transactions on Energy Conversion	Dec. 2022
• Best Paper of High Voltage	Dec. 2023
• First Prize of the Basil Papadimas Award of IEEE PowerTech 2025	Jul. 2025
• Excellent Paper of IEEE PEAC 2018	Nov. 2018
• Excellent Paper of the 22nd CPSS Annual Conference	Nov. 2017
• Star Reviewer of IEEE Transactions on Energy Conversion	Dec. 2021
• Outstanding Reviewer of IEEE Transactions on Sustainable Energy	Feb. 2019
• The Second Prize, the First Beijing's Universities AI Academic Forum Award	Mar. 2019
• The First Class Fellowship, Tsinghua Graduate Student Professional Practice	Dec. 2018
• China National Scholarship	Dec. 2019
• China National Scholarship	Nov. 2018
• Best Presenter at IEEE PEAC 2018	Nov. 2018
• Best Presenter at the 22nd CPSS Annual Conference	Nov. 2017
• The Third Prize, Tsinghua University Student Laboratory Contribution Award	Mar. 2017
• Tsinghua University Academic Scholarship	Dec. 2013
• HAGE Scholarship	May 2013

TEACHING

- **Principles and Systems of Electrical Energy Conversion**, I served as one of two lecturers and delivered 46 h lectures among 64 h, Fall Semester 2025, Tsinghua University.
- **CPSS Power Electronics School**, I delivered 2 h lectures at each time, Nov. 2025 and May 2026, China Power Supply Society.
- **Control Systems** (Prof. Florian Dörfler), Teaching Assistant, Fall Semester 2022, Spring Semester 2023, Fall Semester 2023, Spring Semester 2024, ETH Zürich.
- **Control Systems I** (Prof. Florian Dörfler), Teaching Assistant, Spring Semester 2022, ETH Zürich.
- **Fundamentals of Analog Electronics Technology** (Prof. Hua GENG), Teaching Assistant, for three semesters, Tsinghua University.
- **Electric Drive and Motion Control** (Prof. Geng YANG), Teaching Assistant, for two semesters, Tsinghua University.

STUDENT SUPERVISION

PhD Students Supervision

- **Verena Häberle (ETH)**: Dynamic ancillary services provision in future power systems, co-supervised with Prof. Florian Dörfler, 2022 – 2025, wins the Hans-Eggenberger-Award 2025.

- **Xiang Zhu (Tsinghua):** Optimization of frequency response characteristics of renewable energy systems, co-supervised with Prof. Hua Geng, Jan. 2025 – present.
- **Shanshan Jiang (Tsinghua):** Stability control of DC microgrids during mode switching, co-supervised with Prof. Hua Geng, Jan. 2025 – present.
- **Zelin Sun (Tsinghua):** Decentralized stability analysis and control for AC/DC power systems, co-supervised with Prof. Hua Geng, Jan. 2025 – present.

Master Students Supervision

- **Alberto De Luca (ETH & Tsinghua):** Data-driven control of grid-forming inverters, Fall 2026.
- **Shijie Peng (Tsinghua):** Contraction and stability analysis of power systems with grid-forming inverters, Fall 2025 – Present.
- **Ramona Stoll (ETH):** Grid code validation of cross-forming controlled converters under current limitation, Fall 2024.
- **Roger Domingo-Enrich (ETH):** Complex frequency control of dynamic virtual power plants, Spring 2023.
- **Martin Pedersen (ETH):** Aggregated modeling of grid-forming converters with complex droop control, Spring 2023.
- **Maitraya Avadhut Desai (ETH):** Stable current-limiting control for grid-forming converters, Fall 2022.

RESEARCH PROJECTS

- **National Natural Science Foundation of China (NSFC), Excellent Young Scientists Fund Overseas Program:** Renewable Energy Integration 2026 - 2028
Principal Investigator
- **Horizon Europe AGISTIN Project:** Advanced Grid Interfaces for innovative STorage INtegration (AGISTIN) [\[link\]](#) Jan. 2023 – Jan. 2025
T3.5 Task Leader
- **Horizon Europe POSYTYF Project:** POWering SYstem flexibiliTY in the Future (POSYTYF) through Renewable Energy Sources [\[link\]](#) Nov. 2021 – May 2024
T4.2 Task Leader
- **IEC TS 63406:2025:** Generic RMS Simulation Models of Converter-Based Generating Units for Power System Dynamic Analysis [\[link\]](#) Apr. 2018 – Oct. 2025
Principal Drafter; Secretary of IEC SC 8A WG 8
- **Young Innovation Foundation of Beijing National Research Center for Information Science and Technology:** Distributed Control Theories and Technologies for Lunar Base Energy Systems Jan. 2026 – Dec. 2027
Principal Investigator
- **Dongfang Electric Autocontrol Engineering Co., Ltd.:** Research and Development of Key Technologies for Full-Condition GFM PCSs Jan. 2026 – Dec. 2026
Principal Investigator
- **CSG Electric Power Research Institute:** Standardized Modeling of Wind-Solar-Storage Complementary Systems and Grid-Forming Control Dec. 2025 – Mar. 2027
Co-Principal Investigator

- **National Natural Science Foundation of China:** Flexible Grid-Connection Control and Application of Wind Energy Conversion Systems Jan. 2018 – Dec. 2020
Key Participant
- **National Natural Science Foundation of China:** Large-Disturbance Stability and Cascading Failure in Power Systems with High Penetration of Power Electronics Jan. 2021 – Dec. 2024
Key Participant

ACADEMIC SERVICES

- **IEC Standardization Activities:** Expert, WG Secretary of IEC SC 8A WG 8 *Modeling of Renewable Energy Generation for Power System Dynamic Analysis*
- **Session Chair:** IECON 2021, RPG 2021, FAFEE 2026
- **Invited Session Speeches:** IECON 2021, SPIES 2022, PEET Workshop 2023, FAFEE 2025, EI² 2025, Champéry Power Conference 2026
- **Guest Editor:** Cybernetics and Intelligence, Journal of Electrical Engineering
- **Workshop Organizer** Power Electronics Emerging Technologies (PEET) Workshop 2025 (Xi'an)
- **Committee Member:** Artificial Intelligence Technical Committee of CPSS
- **Membership:** IEEE, CPSS, CAA
- **Reviewer**

Power Systems Journals: IEEE TPWRS / TSTE / TSG / TEC / TPWRD / OAJPE / PESL / PEM, CSEE JPES, IJEPES, IET GTD / ESI

Power Electronics Journals: IEEE TPEL / TIE / JESTPE

Control Journals: IEEE TAC / TCNS, Automatica, Control Engineering Practice

Interdisciplinary Journals: IEEE TIA / TII / JETCAS / Access

Received the Star Reviewer Award of IEEE TEC (2021) and the Outstanding Reviewer Award of IEEE TSTE (2019).

TALKS

- **Invited Tutorial at IECON 2021:** *Transient stability of power electronics-dominated power networks: principle and application*, Oct. 2021, remote. [\[pdf\]](#)
- **Invited Talk at the Fourth Champéry Power Conference:** *Quantifying stability conditions for grid-forming and grid-following heterogeneous power systems*, Feb. 2026, Champéry, Switzerland. [\[pdf\]](#)
- **Plenary Speech at the Power Electronics Emerging Technologies Workshop:** *Multivariable grid-forming control and nonlinear stability analysis*, Oct. 2023, Nanjing, China. [\[pdf\]](#)
- **Invited Lectures at the CPSS Advanced Technologies School:** Transient operation and stability control of grid-forming converters, Nov. 2025 and May 2026, Shanghai, China. [\[pdf\]](#)
- **Invited Session Talk at EI² 2025:** *Lunar surface power grid architecture and control*, Dec. 2025, Jilin, China.
- **Invited Session Talk at FAFEE 2025:** *Complex-frequency grid-forming control*, May 2025, Xiamen, China. [\[pdf\]](#)
- **Invited Tutorial at EirGrid:** *Grid-forming, grid-following, and cross-forming controls*, Aug. 2024, remote. [\[pdf\]](#)

- **Invited Talks at Shanghai Jiao Tong University and Hefei University of Technology:** Grid-forming control and decentralized stability analysis of renewable energy systems, Jan. 2026, China. [\[pdf\]](#)
- **Invited Session Talk at International Conference on Smart Power & Internet Energy Systems (SPIES 2022):** *Complex-frequency synchronization and multivariable stability analysis*, Dec. 2022, remote.
- Oral Speech at IECON 2024, *Dynamic complex-frequency control of grid-forming converters*, Nov. 2024, Chicago, USA.
- Oral Speech at the Third Champéry Power Conference, *Stability guarantees for grid-forming complex droop control*, Feb. 2024, Champéry, Switzerland.
- Coffee Talk at IfA, ETH, *Multivariable stability of converter-based power systems: centralized and decentralized methods*, Apr. 2023, ETH Zürich.
- Oral Speech at IAS Annual Meeting 2020, *Synchronization stability analysis and enhancement of grid-tied multi-converter systems*, Oct. 2020, remote.
- Oral Speech at PESGM 2020, *Transient stability analysis and enhancement of renewable energy conversion system during LVRT*, Aug. 2020, remote.
- Oral Speech at IEC SC 8A ahG 3 Meeting, *Modeling of inverter-based generation for power system stability studies*, Oct. 2019, Nanjing, China.
- Oral Speech at PESGM 2019, *Modeling recommendation of wind turbine/farm for power system stability studies*, Aug. 2019, Atlanta, USA.
- Oral Speech at PESGM 2019 (on behalf of Prof. GENG), *Hardware-in-the-loop (HIL) tools for power engineering education*, Aug. 2019, Atlanta, USA.
- Oral Speech at PESGM 2019, *Dynamic equivalent modeling of wind power plants for various timescale small signal stability analyses*, Aug. 2019, Atlanta, USA.
- Oral Speech at IEEE PEAC 2018, *Synchronization stability analysis of grid-tied power converters under severe grid voltage sags*, Nov. 2018, Shenzhen, China. (Best Presenter Award)
